MY HOBBY

The word hobby is derived from hobby horse's which is a stick fixed with a wooden horse head which children ride astride for their amusement. We still talk of a person riding his hobby. Hobby means something we do in our spare time to kill our boredom.

Francis Bacon wrote in his book of Gardens that:

**God himself planted a garden and it is the purest of human pleasure.
Nature is a true and dependent guide of man.**

Words Worth content that:

"Nature never betrays who loves her".

There is an open space for gardening in my house. So, the thing which attracts me the most is gardening. I have planted some flowers like lily, rose sunflower, and pansy in my house. I have also planted trees which increases the beauty of my house.

As we know, our world is full of stress, efforts and struggle. So everyone should have a hobby because it offers amusement and joy and relieves stress.

Those peoples who are free or old and cannot do anything, they should also have hobby because;

**If we rest, we rust. If we work, we shine.
If we shine the world gives us credit.**

Those people who are busy in their routine and do not have time for hobby are restless.

The basic reason for my gardening is that it reminds me of the creator of everything The Allah Almighty and makes me think that it is His beauty.

**Everyone asks me that do you have time for hobby?
I say that we must have time for hobby.**
