ROAD ACCIDENT

Last winter I happened to travel with my father from Chakwal to Lahore. We boarded a coach which almost carried about 30 passengers. We had hardly covered a distance of about 5 Km, when we saw a mini bus coming from the opposite direction.

The driver did not control the bus on a sharp turn due to overspeed. As a result the mini bus collapsed with our bus. As a result the mini bus became a turtle and was totally ruined. This collision was very loud. The bus driver and three passengers died on the spot while the right side of bus was destroyed. The passenger sitting on the right side of our coach was badly injured. On the other hand the driver of our coach did not lose his senses and controlled the bus. The traffic stopped, ambulance came and rescued the people. After a few minutes police came and completed their proceedings. I always get terrified when I remember this accident.
