ROAD ACCIDENT

Introduction:

Road Accident is caused by disobeying of traffic law. It is often caused by one-Wheeling. It is common in Pakistan.

The Road accident:

One day I was walking on the footpath by the road. A young boy was doing one-wheeling. The traffic light was red; He did not care and cross the red light. The police was there. They did not stop him. As he disobeys the traffic light, a car at speed of 100 kph hit the motor bike. The car hit the bike so hard that the young boy some car and then fall. The blood was running from his body like a stream. The people called rescue 1122. I cannot see the blood, So I ran from there. The next morning in newspaper the news of the accident was published and the boy died. Is it the fault of the boy who was doing one wheeling or the police who did not stop the child or the car who was driving car fast or of all?

Avoidation of Road accident:

Our life is a precious thing. We must take care of it. We must avoid road accidents. We can avoid road accident by obeying the traffic laws. Do not one wheeling, Drive car at medium speed and go in one way line
